This presentation contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend such forward-looking statements to be covered by the safe harbor provision for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and include this statement for purposes of complying with these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words "may," "will," "could," "believe," "expect," "intend," "anticipate," "estimate," "project," or similar expressions or variations thereof and include, without limitations, statements regarding our future estimated rental income, funds from operations, adjusted funds from operations and our dividend. You should not rely on forward-looking statements since they involve known and unknown risks, uncertainties and other factors which are, in some cases, beyond our control and which could materially affect our results of operations, financial condition, cash flows, performance or achievements. Currently, a significant risk and uncertainty we face is the adverse effect of the resurgence of the COVID-19 pandemic, and the various governmental responses thereto, on our and our tenants' financial condition, results of operations, cash flows and performance, and the pandemic's impact on the real estate market, global economy and financial markets. The extent to which the resurgent pandemic impacts us, our tenants and the economy generally will depend on future developments, which continue to be uncertain and cannot be predicted with confidence, including the scope, severity and duration of the pandemic, the actions taken to contain the pandemic or mitigate its impact, and the direct and indirect economic effects of the pandemic and containment measures, among others. Moreover, you should interpret many of the risks identified in this presentation, as well as the risks set forth in the reports we file with the Securities and Exchange Commission (the "SEC"), as being heightened as a result of the ongoing and numerous adverse impacts of the pandemic pandemic. Additional uncertainties, risks and factors which may cause actual results to differ materially from current expectations are contained in our SEC filings, and, in particular, the sections of our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q captioned "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". Copies of the SEC filings may be obtained from us or the SEC. We do not undertake to publicly update or revise any forward-looking statements included in this presentation, whether as a result of new information, future events or otherwise.

NON-GAAP FINANCIAL MEASURES

ONE
LIBERTY
PROPERTIES, INC.

One Liberty compute funds from operations, or FFO, in accordance with the "White Paper on Funds From Operations" issued by the National Association of Real Estate Investment Trusts ("NAREIT") and NAREIT's related guidance. FFO is defined in the White Paper as net income (calculated in accordance with GAAP), excluding depreciation and amortization related to real estate, gains and losses from the sale of certain real estate assets, gains and losses from change in control, impairment write-downs of certain real estate assets and investments in entities where the impairment is directly attributable to decreases in the value of depreciable real estate held by the entity. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect FFO on the same basis. In computing FFO, One Liberty does not add back to net income the amortization of costs in connection with its financing activities or depreciation of non-real estate assets. One Liberty computes adjusted funds from operations, or AFFO, by adjusting from FFO for our straight-line rent accruals and amortization of lease intangibles, deducting lease termination fees and adding back amortization of restricted stock and restricted stock unit compensation expense, amortization of costs in connection with its financing activities (including our share of our unconsolidated joint ventures), income on insurance recoveries from casualties and debt prepayment costs. Since the NAREIT White Paper does not provide guidelines for computing AFFO, the computation of AFFO may vary from one REIT to another.

One Liberty believes that FFO and AFFO are useful and standard supplemental measures of the operating performance for equity REITs and are used frequently by securities analysts, investors and other interested parties in evaluating equity REITs, many of which present FFO and AFFO when reporting their operating results. FFO and AFFO are intended to exclude GAAP historical cost depreciation and amortization of real estate assets, which assumes that the value of real estate assets diminish predictability over time. In fact, real estate values have historically risen and fallen with market conditions. As a result, management believes that FFO and AFFO provide a performance measure that when compared year over year, should reflect the impact to operations from trends in occupancy rates, rental rates, operating costs, interest costs and other matters without the inclusion of depreciation and amortization, providing a perspective that may not be necessarily apparent from net income. Management also considers FFO and AFFO to be useful in evaluating potential property acquisitions.

FFO and AFFO do not represent net income or cash flows from operations as defined by GAAP. FFO and AFFO should not be considered an alternative to net income as a reliable measure of our operating performance; nor should FFO and AFFO be considered an alternative to cash flows from operating, investing or financing activities (as defined by GAAP) as measures of liquidity. FFO and AFFO do not measure whether cash flow is sufficient to fund all of our cash needs, including principal amortization, capital improvements and distributions to stockholders.

Management recognizes that there are limitations in the use of FFO and AFFO. In evaluating our performance, management is careful to examine GAAP measures such as net income and cash flows from operating, investing and financing activities.
